Belzona Polymerics Announces a Simple Repair Solution to Oil Leaks

Harrogate, England – (April 2008) Belzona Polymerics Limited, providing solutions to the fishing industry for over 55 years through industrial protective coatings and polymer repair composites, have launched a cost effective repair for applications within oil contaminated environments.

Utilising innovative technology, Belzona® 1831 (Super UW Metal) is the material of choice for cold bonding or leak sealing on fuel tanks, hydraulic lines and marine engines.

Belzona® 1831 (Super UW Metal) has good corrosion and chemical resistance and can be applied in situ, consequently reducing downtime. This surface tolerant paste grade material eliminates the need for specialist tools and is a cost effective solution to your repair and maintenance needs at a fraction of the cost of replacement.

The Belzona product range is manufactured through stringent quality and environmental control guidelines complying with the internationally recognised requirements of ISO 9001:2000 and ISO 14001:2004.

About Belzona Polymerics Ltd.

Manufacturer of industrial protective coatings and repair composites since 1952, Belzona provides a wide variety of applications to rebuild, repair and maintain machinery, equipment and building structures. Belzona's local on-site Technical Consultants analyze the situation, recommend the solution, and supervise the application. With their Global Distribution Network covering over 120 countries and 24-hour Technical Support, Belzona is established in the forefront of industry by serving such markets as oil and gas, power, marine, and water/wastewater.
