**Belzona, Inc. Announces Use of
Belzona® 1341 (Supermetalgilde) Product to Enhance Pump Efficiency**

Miami, FL – (August 2, 2007) Belzona Inc., a leader in erosion-corrosion technology for over 50 years, announces a major advancement in fluid flow efficiency, combined with outstanding erosion-corrosion protection.

Energy losses due to the effects of viscous drag and surface roughness accentuated by erosion-corrosion effects are drastically reduced with the application of Belzona® 1341 (Supermetalgilde). Independent testing performed at the National Engineering Laboratory* has proven that Belzona® 1341 (Supermetalgilde) can increase the efficiency of new pumps by as much as 6%. Case in point, the protective coating applied to the interior volute and impeller of a 1,000 hp Worthington 16LN35 water pump housed at a water supply facility in Des Moines, Iowa resulted in increased wire-to-water efficiency of 7.2%. The unique hydrophobic nature of the Belzona® 1341 (Supermetalgilde) system forced the water to simply roll off, while minimizing the effects of abrasion due to the product's encapsulated blend of lubricating and abrasion resistant filters.

Belzona Technical Service Engineer, Ivan Ordaz adds, "Pumps that have already suffered heavy erosion or cavitation damage can realize efficiency increases as high as 35% through rebuilding and coating using various Belzona solutions."

Applied by brush, roller, or spray; Belzona® 1341 (Supermetalgilde) is suitable for contact with potable water and is certified to ANSI/NSF Standard 61.

*Testing for Belzona Supermetalgilde® was carried out under strict independent laboratory conditions utilizing the most up-to-date fluid flow test facilities of the National Engineering Laboratory (N.E.L.) who, as part of the United Kingdom's Department of Trade and Industry, represent the most comprehensive pump test facilities of their type available anywhere in the world.

About Belzona Inc.

As the manufacturer of industrial protective coatings and repair composites since 1952, Belzona provides a wide variety of solutions to rebuild, repair and maintain machinery, equipment and building structures. Belzona's local on-site Technical Consultants analyze the situation, recommend the solution, and supervise the application. With their Global Distribution Network covering over 120 countries and 24-hour Technical Support, Belzona is established in the forefront of industry by serving such markets as oil and gas, power, marine, and water/wastewater.
